

# BOLFRESH® LB 500

## Breathable Tray Lidding Shrink Film

**LB 500** is a permeable tray lidding film, with anti-fog properties. This film is suitable for fresh food products with a short shelf life, as well as for frozen food products. **LB 500** film provides a leak proof package that prevents liquid leakage and contamination risks. With its high shrink level and elasticity, **LB 500** is particularly suited for trays containing protruding products.

## Advantages

- With a high percentage of free shrink, superior gloss and transparency, **LB 500** offers an attractive shelf presentation.
- For use on trays with PE sealant, such as foam trays, but also on the new PET and PP trays. A perfect alternative to cling stretch films.
- **LB 500** films are ideal on trays with cubed or sliced products such as fresh meat, poultry, cheese, snack food, etc.
- **LIDTEC® LB 500** complies with all the relevant FDA (USA) and FIA (Canada) regulations on food materials.
